## Perlick Simplifies Bar Building

- ▶ Complete design flexibility adaptable to most bar configurations.
- ▶ All steel structure won't warp, twist or deteriorate.
- ▶ Arrives at job site with underbar equipment installed, in sections up to 8½' feet long.
- ▶ Roomy, open-access chase allows beverage lines to be set in place.
- ▶ Dedicated chases for electrical and plumbing lines.
- ▶ Stainless steel interior from top to bottom on bartender side for smooth, finished appearance.
- ▶ Interior bottom finish panel adjusts so structure can be sealed to the floor.
- ▶ Removable millwork provides convenient access to utility and beverage lines for modification, maintenance or repair.

# Bar building technology for today and the future

## The Perlick Modular Bar System

Once you're aware of its great time and money saving features, building your next bar with a Perlick Modular Bar System is an easy choice.

Unlike a traditionally constructed bar die, everything fits because the structure is built to exact specifications. So instead of days of time-consuming and expensive delays, the Perlick Modular Bar system can be installed without a hassle in a matter of hours.

And, there's no complicated underbar equipment installation because it's been pre-installed at the factory. Plus roomy beverage and utility chases give installers plenty of room to make their installations. Finally, the front panels and bar top can be fabricated off site saving numerous trips to ensure a good fit. All this convenience saves installation delays and labor costs, so your bar can be up and running in a fraction of the time it took in the past.

We've given some good reasons why you should build your next bar with a Perlick Modular Bar System. There's no reason to look any further. Call us today.

All stainless steel interior  
not only looks good, but  
is easy to keep clean.

Trunk housing is set into ample  
beverage chase for simple installation.

Bar panels and  
top fabricated  
in the finish of  
your choice.
